

her condition is such that she requires constant attention day and night?

A Yes, sir. If she were in the house where she could get out without someone being with her, she would be apt to go out right off into the woods, and might freeze to death.

Q While she was still at the Frederick City Hospital before she was taken to your institution do you know whether they had difficulty with her in keeping her in her room and in bed?

A I understand they had quite a bit of difficulty there.
